keyTec RPE/RPS.

The modern locking systems.

The number of mechanical locking systems on the market is too great to get a handle on. Does this traditional market segment still offer any potential for major product improvements at all? It certainly does! The new Winkhaus keyTec RPE and RPS locking systems prove it.

Locking systems as they are needed today.

Winkhaus has thoroughly analysed the current needs of the market. We have taken both commercial requirements and the users' interests into account in product development. This resulted in two locking systems which set new standards in technology and are equally attractive to merchants and users alike.

Reliable, diverse, innovative.

Winkhaus' keyTec RPE and RPS systems cover the requirements for individually-secured cylinders as well as for small and medium-sized locking systems. The system is optionally available as a Winkhaus factory system or as a service locking system for self-pinning of locking cylinders. The brand and copy protection ensure success for many years to come.

A close-up portrait of a middle-aged man with grey hair and blue eyes, resting his chin on his hand in a thoughtful pose. He is wearing a grey sweater over a red shirt.

**»At last, a system
makes me truly flexible!«**

Dirk Neumann,
Specialist dealer in security technology

**keyTec RPE/RPS meets
my requirements:**

- + **Technical copy protection**
- + **Attractive key design**
- + **For individually-secured and
keyed-alike cylinders**
- + **For self assembly of locking
systems (RPS)**

Versatile: Diverse factory colours.

Blue

Canola yellow

Ruby red

Mint green

Deep black (standard)

Dynamic spectrum

The colour coding system is easily installed with RPE/RPS keys. In addition to black, the standard colour, you and your customer can easily choose between other eye-catching cap colours available from the factory. This way, you can offer your customers ideal organisation and overview on the keychain from the very start. The colour can later be changed at any time.

The unmistakable material and design concept underscores Winkhaus locking systems' special position on the market and helps you with a sales-boosting positioning of your offer.

How to make an impression on your customers.

Embossing area on the back side of the key

Your logo on every key

This is what innovative key design looks like today. The shaping is dynamic and ergonomic at the same time, the combinations of materials made of nickel silver and high-grade plastics are striking and durable.

You can have your own retailer logo embossed from the factory as an option. That way, you'll be with your customer at all times – not to mention during each reordering.

Show your profile with Winkhaus' new keyTec RPE/RPS systems. Your flexible answer to demanding customer requests!

keyTec RPE. Ingenious. Clever. Elegant.

Ready for sale from Winkhaus

The **keyTec RPE** locking system from Winkhaus is the innovative basis system for individually-secured locking cylinders. The intelligent mechanical concept with a unique combination of benefits sets new standards on the market. The keyTec RPE system allows you to offer your customers state-of-the-art locking technology in tried-and-true Winkhaus quality.

keyTec RPE in your product range

The keyTec RPE key system is the new standard for individually-secured systems, optimal for keyed-alike cylinder sets such as in small companies, stores, your own house, etc. The keys are made at the Winkhaus factory, tailored for immediate use and delivered to you as consumer goods.

For individually-secured systems.

Technical features

- + New profile – patent pending
- + Technical copy protection on the key
- + Long key bow for modern protective fittings
- + Optimised key tip for improved insertion
- + Lock-picking protection featured as standard
- + Locking pin with rib scanning
- + 5-pin system with up to 8 radial pins

RPE – the benefits at a glance

- + For single-secured or keyed-alike cylinders
- + Non-slip key made of nickel silver with high-grade plastic
- + Modern key design
- + Caps in a variety of colours

With a keyed-alike system, all doors in the house can be opened with a single key. This example shows a single-family house.

keyTec RPS.

The versatile locking system.

For do-it-yourself assembly of individual locking systems

The **keyTec RPS** locking system has all of the properties of the previously described keyTec RPE; an additional rib pin makes the system even more versatile and secure. It is the ideal system for building medium-sized locking systems yourself on customer order. The keyTec RPS system unites reliability, a high degree of variability and attractive design in a single groundbreaking product concept.

keyTec RPS enables you to create locking systems with different locking rights, such as with master keys and central cylinders.

keyTec RPS in your product range

Winkhaus' keyTec RPS system is the versatile product for customers doing the cylinder pinning themselves: You can create customer-specific locking systems of your own design. This allows you to offer small and medium-sized companies an economical and future-proof solution. The RPS system is also suited for secured locking systems in customers' special profiles.

For self-pinning.

Technical features

- + New profile – patent pending
- + Additional rib pin for increased versatility in coding
- + Technical copy protection on the key
- + Long key bow, optimum for modern protective fittings
- + Optimised key tip for improved insertion
- + Lock-picking protection featured as standard
- + Profile tree to distinguish between differs
- + Locking pin with rib scanning
- + 5-pin system with up to 8 radial pins

RPS – the benefits at a glance

- + Ideal for the do-it-yourself assembly of small and medium-sized locking systems
- + Secured locking systems in customers' special profiles
- + Modern key design
- + Caps in a variety of colours
- + Establishment of locking plan from the factory (optional)

The reserved profile tree gives you a flexible system structure in the creation of locking hierarchies. This example shows a law firm.

Winkhaus. Our expertise provides the best solution.

Winkhaus has offered uncompromising commitment to quality since 1854 with great success. Numerous innovations have enabled us to consistently advance quality standards for window fittings, door technology and security door locking systems. Winkhaus products represent state-of-the-art German-made window technology.
