Winkhaus X-Pert S Profile Cylinder with 'anti-bump' protection

This has been designed with domestic properties in mind.

It uses an open profile section which means that duplicate keys can be obtained very quickly from any locksmith on the High Street whilst offering the same high level of German engineering as those in our higher specification ranges so you can be sure that it will continue to operate for many years to come.

The X-pert S Profile Cylinder recently underwent comprehensive 'anti-bump' tests conducted by the UK Locksmiths Association in October 2007, Adam Jackson, Director of UK Locksmith Association quoted "Due to the design of the cylinder and the anti-pick pins we could not bump the cylinder open. Very impressive." And his overall verdict of the X-Pert S Cylinder is "We found this lock to be of extremely high quality and with superb durability. Very impressive".

Features:

- 5 tumbler pins on each side
- Core pins made of resistant hard bronze
- Single unrestricted profile, ideal for homeowners
- X-Pert S exceeds EN1303 requirement for number of cycles
- Supplied with 3 keys per cylinder
- Also ideal for small, simple master key systems

Options available:

- Euro Profile
- Thumbturn Profile
- Single Cylinder
- Double Cylinder
- Rim Cylinder
- Polished Nickel or Brass Finish
